

10.1.12: MyDigitalSSD USB 3.0 External 2.5" SATA / mSATA SSD Enclosure Combo

Here at MyDigitalSSD we are proud to introduce our new line of HDD and SSD accessories aimed to help users make the most out of their next upgrade. To kick things off, we are spotlighting our Better mSATA to SATA III Adapter Board and USB 3.0 Enclosure, two products that are ideal for any cloning, accessing and any portable storage needs you may have.

The **mSATA to 2.5" SATA II/III 6G SSD Adapter Board** makes it possible to use any [mSATA](#) solid state drive, made primarily for tablets and notebooks, in any device with a standard 2.5" SATA connection, such as notebooks, 2.5" external cases, or desktops. It converts both 25mm or 50mm mSATA drives and delivers maximum speed allowed by the device it's being used in for optimum performance.

The **USB 3.0 External 2.5" SATA SSD/HDD Enclosure** allows users to use any 2.5" hard drive, solid state drive, or adapter as a mobile storage device. The enclosure is light and durable aluminum complemented by black and silver trim, giving a sleek look while still convenient and accessible. Whether you're looking to clone your existing OS and files to your new drive or simply accessing your old drive after you've upgraded, this enclosure will provide optimum drive speeds when connected through a USB 3.0 port as well as high speeds when used in a USB 2.0 port.

Together they make up our **MyDigitalSSD USB 3.0 External 2.5" SATA / mSATA SSD Enclosure combo**, providing everything you'll need for on-the-go cloning and storage with simple plug and play technology.

For more information on these products, visit our [Accessories](#) page on MyDigitalSSD.com.

All three products are currently available at MyDigitalDiscount.com (see links below) and can soon be found at MyDigitalSSD resellers worldwide.
