

MyDigitalSSD Takes It To The Next Level

October 17, 2011

MyDigitalSSD.com has undergone a sweeping redesign and has transformed into the prime source for the latest and greatest solid state drives at the lowest prices on the market. Our new look makes navigating the site quick and easy to find expanded information on all of our MyDigitalSSD featured products from solid state drives to flash memory cards.

To stay connected with our customers, we've added our dedicated [Twitter](#) feed on the right hand side of most pages that updates in real time. Make sure to follow [@MyDigitalSSD](#) for the latest MyDigitalSSD news and special offers!

Right now is an exciting time to own a solid state drive. These drives, namely our Bullet Proof lines of SSDs, are the hottest in data storage technology by vastly reducing load times and vastly increasing read/write times. We love SSDs, and hopefully you will too once you see the difference for yourself.

Established in 2008, MyDigitalSSD aims to provide our customers with a variety of quality flash-based products that offer the performance and reliability of other bigger name brands without their big name price tags. MyDigitalSSD makes every effort to stand out as a reliable and honorable name in the computer hardware market by only offering the highest quality flash based components to meet or exceed professional level needs at consumer level pricing.

We welcome distributors, manufacturers, retailers, and end users to experience the difference MyDigitalSSD products make in devices ranging from computers (PC or Mac) to DSLR cameras to HD camcorders and more. Indeed, there is something for everyone at [MyDigitalSSD.com](#).
