New Products: MyDigitalSSD SBX Series PCIe Gen 3 x2 NVMe 80mm (2280) M.2 Solid State Drives

Say hello to GB/s with MyDigitalSSD's latest X-Series release, the consumer grade MyDigitalSSD Super Boot eXpress (SBX) PCIe 3.0 x2 NVMe SSDs featuring the Phison E8 (PS5008-E8) controller.

The follow-up to MyDigitalSSD's award-winning enterprise BPX series, SBX NVMe SSDs offer a cost-competitive upgrade option to SATA SSDs with max sequential speeds of 1.6GB/s read and 1.3GB/s write.

Designed with best-in-class price, performance, and endurance in mind, SBX pairs Toshiba TLC 3D NAND with NVMe technology to maximize bandwidth while lowering latency for guaranteed peak performance under heavy workloads for near-instant responsiveness when used as either a boot or storage device in Z97 / X99 / X199 / X299 / Z170 based motherboards and more.

The onboard Phison E8 controller comes packed with features to keep your data secure, including end-to-end data path protection, power loss protection, secure erase, and support for APST / ASPM / L1.2 power saving modes. The E8's ground breaking design also utilizes PCI Express 3.0 x2, freeing up two PCI-e lanes while lowering power consumption, creating less heat and longer notebook battery life without effecting performance.

MyDigitalSSD SBX M.2 SSDs provide added flexibility for PC enthusiasts, gamers, and system designers thanks to a thin, single-sided 80mm (2280) form factor that conserves space for other components in thinner and lighter devices.

Get even more out of today's next-gen notebooks, Ultrabooks, NUC mini PCs, All-In-Ones, desktop workstations, and servers; experience GB/s performance today with the SBX.

SBX drives are expected to begin shipping to authorized retailers in late October at the following capacities and MSRP with an industry leading 5-year limited warranty up to 800 terabytes written (TBW).

128GB: \$64.99 | 256GB: \$104.99 | 512GB: \$184.99 | 1TB: TBA

MyDigitalSSD SBX 80mm (2280) M.2 PCIe Gen3 x2 NVMe SSDs will be soon be available at Amazon and Newegg. Preorder now at low introductory pricing exclusively at MyDigitalDiscount.com.
