

8.14.13: Introducing The All-New MyDigitalSSD Super Cache 2 mSATA III 6Gb/s SSD with FREE FNet HybriDisk Caching Software Code

MyDigitalSSD delivers where others cannot - Our all-new Super Cache 2 SSD is the world's fastest low density Cache Drive and/or Boot Drive that delivers up to a 50X boost in performance over a standalone HDD starting at less than the cost of a couple of Blu-Rays.

Get a 24GB for \$39.99, 32GB for \$42.99, 64GB for \$62.99, or 128GB for \$99.99.

Features include:

- The brand new PHISON S9 controller delivers high speed at lower density with a 24GB-128GB sweet spot.
- Toshiba original 19nm Toggle (Sync) MLC NAND Flash for transfer speeds up to 550MB/s.
- A FREE license code for FNet HybriDisk caching software is included with each Super Cache 2 drive - a quick and easy-to-use program to setup a cache drive in minutes.

For more details, including real-world benchmark testing using a Lenovo ThinkPad X220, visit <http://mydigitalssd.com/msata-ssd.php#50mm-sc2-msata-ssd>.

Super Cache 2 SSDs are now currently available for preorder at MyDigitalDiscount.com, here: <http://tinyurl.com/jwyhm67>

Later this August, Super Cache 2 drives will be available for purchase on Amazon as well as MyDigitalSSD retailers worldwide.

Be on the lookout for full product reviews in the next few weeks from your favorite reviewers. This press release will be updated regularly on MyDigitalSSD.com as they are posted.

If you're a reviewer who would like to test a Super Cache 2 drive, please contact support@mydigitalssd.com.

Interested OEM builders and resellers, please contact sales@mydigitalssd.com.
